

# People over 75.

- **TAM**  
Everyone the product could serve
- **SAM**  
Where we can operate and charge
- **SOM**  
What we underwrite in three years

# Hand motor impairment, 18+.

- **TAM**  
Everyone the product could serve
- **SAM**  
Where we can operate and charge
- **SOM**  
What we underwrite in three years

## Two ways into the same product.

### People over 75

Age removes the interface, not the will

### Hand motor impairment, 18+

The hands fail before the judgement does

The two populations overlap, so we do not add them. Voice replaces the interface in both cases, which is why one product serves both. Argentina in three years is the number we are actually underwriting.
